1 Цель работы с постановкой задачи

1.1 Цель работы

Изучение особенностей межпроцессного взаимодействия в ОС GNU/Linux.

1.2 Задача работы

Требуется: разработать две программы: первая реализует серверную часть, вторая — клиентскую часть. Обмен данными между ними организуется посредством механизма Internet-сокетов и протокола TCP либо UDP. Результат выполнения выводится на терминал/консоль. Должен использоваться интерфейс командной строки (CLI). При реализации обязательно использование системных (OC Linux), изученных лекционном курсе вызовов предназначенных для работы с сокетами. Программный код, относящийся к пользовательскому интерфейсу, должен быть физически отделен от кода, реализующего межпроцессное взаимодействие, и оба они, в свою очередь, отделены от кода реализации основной логики, например, вычислений. Допускается реализация одной программы в форме Windows-приложения, авторой — в форме Linux-приложения. Далее оговаривается функционал клиентской и серверной частей. Обе части должны быть устойчивы к некорректному пользовательскому вводу. В нечетных вариантах заданий используются потоковые сокеты, в четных — дейтаграммные сокеты.

Вариант 17. Клиент отсылает серверу элементы введенной пользователем квадратной матрицы, а также два введенных им числа — номер столбца и номер строки. Сервер принимает матрицу и номер столбца N и номер строки M, выводит ее на экран, затем «вычеркивает» из матрицы столбец с номером N и

строку с номером М, выводит измененную матрицу на экран, вычисляет и выводит на экран значение ее определителя.

1.3 Описание и пояснение к работе

Используется система сборки Autotools на Linux и CMake на Windows и Linux. Используется интерфейс командной строки. Для сборки, вывода справки клиента и сервера требуется:

```
# linux, autotools, make, gcc
./configure
make
./build/Lab_05_Client -h
./build/Lab_05_Server -h
# linux, autotools, make, clang
./configure CC=clang
make
./build/Lab_05_Client -h
./build/Lab_05_Server -h
# linux, cmake, make, gcc
cd build
cmake ..
make
./Lab_05_Client/Lab_05_Client -h
./Lab_05_Server/Lab_05_Server -h
# linux, cmake, make, clang
cd build
cmake -DCMAKE_C_COMPILER=clang ..
./Lab_05_Client/Lab_05_Client -h
./Lab_05_Server/Lab_05_Server -h
# windows, cmake, msbuild, msvc
cd build
cmake ..
msbuild .\ALL BUILD.vcxproj
.\Lab 05 Client\Debug\Lab 05 Client.exe -h
.\Lab 05 Server\Debug\Lab 05 Server.exe -h
# windows, cmake, mingw32-make, mingw
cd build
cmake -G "MinGW Makefiles" ..
mingw32-make
.\Lab_05_Client\Lab_05_Client.exe -h
.\Lab_05_Server\Lab_05_Server.exe -h
# windows, cmake, mingw32-make, clang
```

```
cd build
cmake -G "MinGW Makefiles" -DCMAKE_C_COMPILER=clang -DCMAKE_CXX_COMPILER=clang++ ..
mingw32-make
.\Lab_05_Client\Lab_05_Client.exe -h
.\Lab_05_Server\Lab_05_Server.exe -h
```
